Purpose of Contact: Notification of completion of the 600-1 Remediation Project

Discussion

At the meeting held earlier today regarding the IHSS Group 600-1, we reviewed the final analytical data and agreed that the 600-1 Remediation Project is considered completed. It was noted that the analytical results showed there were no remaining Tier I exceedances and the Tier II exceedances were limited to benzo(a)pyrene, dibenz(a,h)anthracene, benzene, and methylene chloride. It was also discussed that there will need to be inclusion of data relative to wildlife workers in the annual stewardship reports that will be developed at a later date. Earlier today, Dave had driven by the 600-1 project area and we agreed that though the current surface is not what will be expected for final configuration, no further contouring is necessary in association with this project.
